ENGINEERING MANAGER · .NET / ANGULAR ARCHITECT

XAVIER TRIPLETT.

I build web applications with Angular and .NET, and I lead the engineers who build them with me.

HIGHLIGHTS

- 1-month build** **A FRED MCP server for OpenAI.** A Python MCP server connecting OpenAI models to Federal Reserve (FRED) data, hardened with hundreds of hand-written evals.
- 50% turnover · 8 launches** **Building a team that ships.** Turned a team people kept leaving into one that keeps its engineers and ships client work on a repeatable process.
- 2x revenue in 1 yr** **Doubling our biggest client.** Took over the company's largest client and grew it instead of just maintaining it.

EXPERIENCE

Buildable

Nov 2018 – Present · Oregon

Software Engineering Manager

Jun 2022 – Present

Ran half of the engineering team while still shipping code every week as an individual contributor.

- Worked with the VP of Engineering to create a consistent process and a rubric to grade engineering work.
- Successfully led multiple million-dollar projects to completion, ensuring high quality and timely delivery.
- Created an AI automation that reduced bugs in production and improved the quality of work delivered by the team.

Software Engineering Team Lead

Jun 2021 – Jun 2022

Led the team responsible for a third of the company's projects.

- Mentored multiple junior engineers and helped them grow into leadership roles.
- Took over the company's largest account, undocumented and highly ambiguous, and doubled its revenue in under a year.
- Extracted complex business rules from the client and translated them into clear deliverables for the team.

Junior Full-Stack Developer

Jun 2020 – Jun 2021

Built features across client products, from the browser down to the database.

- Became a key contributor to the company's most profitable project.
- Balanced work across several client projects each week, juggling competing priorities and deadlines across multiple teams.

Software Engineer Intern

Nov 2018 – Jun 2020

Wrote production code part-time around a double major courseload, learning the ropes alongside the company's senior engineers.

- Learned three programming languages while carrying a full courseload and completing a double major.
- Built features and addressed bugs across multiple client products, from the browser down to the database.

Linfield Computer Lab, Lab Manager. Tutored students two hours a day on computer science coursework.

Feb 2018 – May 2019

Amazon, Warehouse Associate. Sorted hundreds of packages daily, quickly and efficiently.

June – August 2017

Summera, Software Engineer Intern. Self-taught C# in order to build a C# script automating Excel report generation, saving ~10 hours a week.

June – August 2016

SKILLS

BACKEND & DATA

C# · ASP.NET / .NET · SQL · Python · REST APIs · MCP Protocol

FRONTEND

Angular · TypeScript · RxJS / Signals · HTML · CSS

LEADERSHIP

Team management · Mentoring · Planning & staffing · Process design · Client work

EDUCATION

Linfield University, B.S. Computer Science · B.S. Mathematics

2020

Juggled a part time job while tutoring others and finished two Bachelor's degrees full-time.
